DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This unattached building is located on a corner lot on the south side of W. Second Street and the east side of Court Street. It was originally built as a private residence having a one story, recessed wing on the east side of the building that connected it to the adjacent building. It is presently being used as a commerical building.

It is a 2-1/2 story, recangular building of dark Flemish bond brick with a header course above the basement windows. It has a brick foundation of this same pattern. The front facade is three bays in width. In the east and west bays are windows framing 12/1 pane sash. Windows have flat arches with key-stones and paneled shutters. The center bay has a six panel, wooden door with an elliptical fan light, side lights and radiating voussoirs.

The second story has three bays. Each is a double sash window having 8/1 lights and the same flat arch with keystone. The shutters have a solid bottom panel and louvered top panel.

Above are three pedimented dormer windows on the front of the building, having 10/6 lights. Within the grill wall at each end are palladian-type windows (east and west ends).

The decorated boxed cornice has returns, a plain frieze and architrave. There are three bays on the south side of the building. The east end has been altered by the addition of an outside fire escape and wooden door. There is an interior, flush gable inside chimney at the east end of the building.
